Dear Customer,

Rockwell Automation is committed to demonstrating the highest standard of global environmental management. We embrace this as a core value and an integral part of all operations and seek continual improvement of our environmental management system and performance. Our dedication is demonstrated by our compliance efforts as they apply to the European Union Directive (EU) 2015/863/EC to amend Annex II to European Union Directive 2011/65/EU —Restriction of Hazardous Substances (RoHS).

This Directive restricts the use of ten hazardous substances in electrical and electronic equipment.

Rockwell Automation products currently required to comply with Directive 2015/863/EC are Category 3 products (IT and telecommunications equipment) such as industrial computers, monitors, and accessories. Rockwell Automation Category 3 products that fall within the scope of the RoHS Directive are fully compliant with the material restrictions requirements of the Directive.

Furthermore, Rockwell Automation's goal is to meet the RoHS material restrictions requirements for all of our Category 9 products (industrial monitoring and control instruments) prior to the mandatory date of 22 July 2021 set out in the European Union Directive (EU) 2015/863/EC.

In response to your request, below is the European Union Directive (EU) 2015/863/EC RoHS-status for specific products.
